### **Assignment -3**

### **Python Programming**

Assignment Date	08 October 2022
Student Name	Divyanand MH
Student Roll Number	611219106019
Maximum Marks	2 Marks

## Question-1:

Write a Python code for Blinking LED and Traffic Light for Raspberry Pi

#### **Solution:**

# **Blinking Of an LED For Raspberry**

import RPi.GPIO as GPIO # Import Raspberry Pi GPIO library

from time import sleep # Import the sleep function from the time module

GPIO.setwarnings(False) # Ignore warning for now

GPIO.setmode(GPIO.BOARD) # Use physical pin numbering

GPIO.setup(8, GPIO.0UT, initial=GPIO.LOW) # Set pin 8 to be an output pin and set in itial value to low (off)

while True: # Run forever

GPI0.output(8, GPI0.HIGH) # Turn on
sleep(1) # Sleep for 1 second
GPI0.output(8, GPI0.LOW) # Turn off
sleep(1) # Sleep for 1 second

## **Traffic Light for Raspberry Pi**

```
import RPi_GPIO as GPIO
import time
import signal
import sys
# Setup
GPI0_setmode(GPI0_BCM)
GPI0_setup(9, GPI0_OUT)
GPI0_setup(10, GPI0_OUT)
GPI0_setup(11, GPI0_OUT)
# Turn off all lights when user ends demo
def allLightsOff(signal, frame):
    GPIO output(9, False)
    GPIO.output(10, False)
GPIO.output(11, False)
    GPIO.cleanup()
    sys_exit(0)
signal.signal(signal.SIGINT, allLightsOff)
# Loop forever
while True:
    # Red
    GPI0_output(9, True)
    time_sleep(3)
    # Red and amber
    GPI0.output(10, True)
    time_sleep(1)
    # Green
    GPI0_output(9, False)
    GPI0_output(10, False)
    GPI0.output(11, True)
    time_sleep(5)
    # Amber
    GPI0.output(11, False)
    GPI0_output(10, True)
    time_sleep(2)
    # Amber off (red comes on at top of loop)
    GPI0_output(10, False)
```
